

DECEMBER SCHOOL OF THE
MONTH, NEW YORK'S 4TH CON-
GRESSIONAL DISTRICT

HON. CAROLYN MCCARTHY

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, December 8, 2003

Ms. MCCARTHY. Mr. Speaker, it's with great pride that I announce Franklin Elementary School in the Hempstead Union Free School District as School of the Month in the Fourth Congressional District for December 2003.

The Principal of Franklin Elementary School is John W. Moore. Regina Armstrong and Carolyn Townes-Richards are the Assistant Principals, and the Superintendent of Schools is Dr. Nathaniel Clay. Franklin Elementary School is the largest elementary school in the Village of Hempstead with over 750 students in grades Kindergarten through 5, and 115 dedicated staff members. The faculty work to fulfill the school's mission: To achieve a safe and secure educational environment that promotes working with parents and the community to ensure that all students reach and maintain high academic standards.

Despite various factors the students must overcome, they have shown, and maintained, academic progress in their pursuit to achieve and exceed the standards set by the school. The school's motto, "Your choices determine your destiny." * * * Choose them wisely," puts the students' future in their hands and they have succeeded. Through the rich and diverse cultural wisdom of its students and staff, Franklin Elementary School has distinguished itself as a community, county and a national resource. Recognized as a national school of excellence, Franklin Elementary School this year received from the Department of Education the National Blue Ribbon award. The honor is awarded annually to schools to acknowledge the achievements and hard work of the students, staff members, families and community.

Franklin Elementary School's band has been locally and nationally recognized and is regarded as one of the best elementary school bands in New York State. The band has participated in numerous community events resulting in its adoption by the Eastern Regional Federal Aviation Headquarters. The organization has given students mentorship, tours of its facilities, awards and career advice. It is a relationship benefiting both sides, which I hope will be maintained in the future.

Mr. Speaker, the faculty and students, of Franklin, along with the community, have created a wonderful learning environment. I am proud to name Franklin Elementary School the school of the month for December 2003.

HONORING RICHARD A. ELBRECHT

HON. GRACE F. NAPOLITANO

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, December 8, 2003

Mrs. NAPOLITANO. Mr. Speaker, it is with great pride that I rise today to honor Richard A. Elbrecht on the occasion of his retirement from the California Department of Consumer Affairs, an agency with which Elbrecht has served the public since 1976. As the Super-

vising Attorney of the Legal Services Unit, he promoted and practiced the ideal that the law must be accessible to those whom it affects.

Mr. Elbrecht graduated from Yale University in 1955 with a degree in economics and a focus on money, banking and the antitrust law. He also attended the University of Michigan Law School and earned his J.D., 1960. Mr. Elbrecht worked for Legal Aid, the National Consumer Law Center and in private practice in San Jose and Santa Cruz.

But his greatest impact on the people of California was made during his years at the Department of Consumer Affairs where he constantly inspired his staff and co-workers through his intellect, enthusiasm and energy. He has created and maintained a work environment where excellence and innovation flourished. His unit provides a wide range of legal services, including legislative drafting, advocacy before administrative agencies, litigation and education. He has personally worked in a variety of areas of importance to consumers, including banking, electronic funds transfer, telecommunications, insurance, sales, warranties, credit and cable communications. He helped design and administer California's state quality awards program and has performed research on the application of computers and telecommunications to education.

Through this work, Elbrecht has achieved many extraordinary accomplishments on behalf of California's consumers. He drafted the 1991 and 1992 rewrites of the California Small Claims Act and supervised coordination of the Small Claims Court Experimental Project, which led to numerous significant improvements to the small claims court process. He fundamentally reformed practices for selling hearing aids through his representation in *People and Director v. Beltone Electronics Corp.* He assisted policy makers in developing regulations of interest rates in retail installment sales. He played a key role in the conceptualization and enactment of the California Lemon Law, the Song-Beverly Consumer Warranty Act and the Moore Universal Telephone Service Act.

I ask my colleagues to join me in thanking Richard A. Elbrecht for his many years of service to California's consumers. His advocacy and hard work will be greatly missed, and we wish him much happiness and contentment in his retirement.

ADMINISTRATION'S ATTEMPT TO BAN THERAPEUTIC CLONING WORLDWIDE

HON. FORTNEY PETE STARK

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, December 8, 2003

Mr. STARK. Mr. Speaker, I rise today to make clear to my colleagues how the current Bush Administration and their cadre of religious zealots are again attempting to impose their ideological views not just across our country, but across the world. The Administration, with the backing of the anti-abortion movement and several predominantly Catholic countries, is strongly lobbying members of the United Nations General Assembly to vote for a resolution to enact a worldwide ban on therapeutic cloning.

The Administration was not satisfied with their successful effort to cripple stem cell re-

search in this country. Now, they want to use their considerable resources to destroy this promising research field throughout all United Nations member countries. And who will suffer if this effort is successful? People of all races, creeds, religions who suffer conditions as varied as Alzheimer's disease, Parkinson's disease, diabetes, chronic heart disease and spinal injuries. These are the individuals who have the most to lose if therapeutic cloning is banned.

The following is a statement released by Don Reed who is a constituent from Fremont, California. Don and his wife Gloria are tireless advocates of spinal cord research. Their interest in this area is passionate and very personal. Their son Roman was a star college football player until he was paralyzed by a game injury that broke his neck. Since the accident, Roman has been confined to a wheelchair. The Reeds are very much aware of the promise of therapeutic cloning and stem cell research to someday help their son, and many others, to live less restricted lives. This statement describes the efforts of the Administration at the United Nations and provides a poignant view of its effect on his spinal injured son.

WHITE HOUSE BEHIND CHRISTMAS ATTACK ON STEM CELL RESEARCH?

"This is like Scrooge putting Tiny Tim's doctor in jail," said stem cell activist Don C. Reed today, reacting to news that White House officials were part of a stealth campaign at the United Nations to internationally ban all forms of cloning with an up-or-down vote planned for December 8.

"My son is paralyzed with a spinal cord injury," said Reed. "Therapeutic cloning for stem cells is our only realistic hope of cure: that he will one day stand up and walk. But the White House continually attacks that research, apparently because of the religious convictions of the President."

As reported in Thursday's Financial Times of London, the Bush-backed Costa Rica plan would ban cloning everywhere. This would overturn the November 6 vote by the U.N.'s Legal Committee. By a razor-thin margin, (80-79, with 15 nations abstaining) that vote postponed a decision on the controversial therapy for two years.

"Mr. Bush did not like the way that vote turned out," said Reed. "And he wants a new vote. Well, I did not like the way the 2000 Presidential election turned out, but I don't get to have that vote re-done. Millions of people will suffer, if the President can overturn the November 6th U.N. vote. That vote did not approve or disapprove therapeutic cloning. It only says, we should take time to make this important decision carefully. What's wrong with that?"

A more moderate measure, sponsored by Belgium and backed by the UK, would ban reproductive cloning but allow member nations to make their own decisions on therapeutic cloning for medical research. This is opposed by the President, the Catholic church, and anti-abortion organizations.

"The American Medical Association supports therapeutic cloning," says Reed. "As does our own National Academy of Science." Exhaustive studies have been done on therapeutic cloning again and again, both nationally and in the state of California, as well as in countries like England, Israel, Singapore and China. All arrive at the same conclusion: reproductive cloning of children is dangerous to the unborn child, and should be banned; but therapeutic cloning of stem cells is potentially enormously valuable to cure hundreds of diseases and disabilities, and should be preserved.
